EXPECT BIGGER INTEREST

Traders Talk of Closing Out Other Lines to Buy Securities Backed by Allies.

New York, Sept. 13.—Wall street ex-pressed hope today of an amicable solution of the German-American situation by a higher range of prices for stocks several high records being made. With the exception of Eric shares, the rails showed little vitality and continued in the rut in which they have been for months. The market opened strong, with Cruci-le Steel and Bethlehem Steel in front with large over-night gains. General Mo-

Brokers reported a good volume of buying orders, and as the session progressed prices advanced until the last hour, when there was a slight recession on profit tak-ing. The movement upward, however, was again resumed in the last fifteen minutes, so that the close was strong and around the best.

British Loan Attractive.

The financial district is absorbed in the new British loan, which, according to bankers, probably will run from \$500,000,-000 to \$1,000,000,000. Investment bankers express the belief that the flotation will be a distinct success owing to the ple-thora of idle money in the banks. Some investment bankers said today that they contemplated borrowing money at 2 per cent and reinvesting it in the new Brit-ish loan, which they believe will yield at least 5 per cent. Large business concerns together with merchants with idle funds, are expected to set them to work in the new loan, as there is a certainty that there will be a broad and ready market

new loan, as there is a certainty that there will be a broad and ready market for the securities.

Before the Anglo-French commission arrived in this country the general opinion was that the loan would cost the foreigners at least 6 per cent, but since their arrival and declaration that they could send us gold if Americans wanted it, the rate expected to be demanded has dropped I per cent.

Erics Have Good Day.

Quite a few people in the financial district, however, believe that the concentration of such a large amount of money, notwithstanding that it will remain in this country, will cause a tightening up of the money market, with an appreciation in rates.

Consummation of the loan is expected to have a depressing effect on the market for American railway bonds, according to investment bankers, who believe that many investors owning high-grade gallroad bonds yielding around 41-2 per cent will sell and reinvest the proceeds in a security backed by the allies. For this reason, together with steady liquidation by foreigners, no buoyancy is expected in the bond market for some time to come.

Conclusion of the large loan, however, is expected to have a favorable influence on stocks, as it is calculated to remedy the foreign exchange situation, which has Conclusion of the large loan, however, is expected to have a favorable influence on stocks, as it is calculated to remedy on stocks, as it is calculated to remedy the foreign exchange situation, which has induced foreign selling of stocks. The loan also will supply the silies with funds with which to make additional pur-chases of American products, which will be mirrored in more tonnage of the rail-

Bethlehem Steel sold at 335, the highes price in its history and an advance of twenty-three points for the day. Brokers may the tenacity with which odd-lot investors who purchased a few shares of the stock under par are holding thei shares is surprising, in view of the large

paper profits.

The Eries were the bright spots on the half a point and the first and second pre-ferred about two and a half points each.

The time money market was in a state of suspension, pending some definite amouncement as to what will be done by the foreign commission on the allies' loan. In consequence business was very quiet. There was practically no demand except on small industrial loars. On the small inquiry rates continued case. Rates: 2%a2% per cent for sixty days; hab's per cent for four to six months, and 1 per cent for twelve months. The cummercial laper market was a waiting one, pending definite action on the British loan and the clearing up of the international complications. Some healtancy was noted in certain banks, but there was apparently good demand for high-grade material, which was resully absorbed at the same rates as prevailed last week. On the whole the market could be described as narrow and easy. Prime names of sixty to ninety days' maturity passed at 3 per cent to 3% per cent and choice four to six months' fesure at 3% to 3% per cent. | Southern Pacific | Southern Pa
